

# Smarter records for safer healthcare

Use voice and video technology to educate clinicians, empower patient and protect the care journey

# Noting in Medicine is Evolving.

## Video and Voice improve Training & Recording

- ▶ Data entry and event recording in frontline medicine is poor, and unsatisfying for all involved.
- ▶ EMRs are a source of burnout for Physicians.
- ▶ Students miss-out on opportunities to learn - Covid 19
- ▶ Home and domiciliary care rapidly developing with no usable solutions.

**1980s**

**Noting in Medicine**

**Round Safely helps providers to use digital media to educate students, empower patients and free clinicians to care.**

Easy Data Entry

Verbatim Records for Patients

Medic-legal protection for insurers

# We have designed a simple way to record and share consultations in Medicine.

## App Features

Easily and securely record clinical training videos in a HIPPA, GDPR compliant environment. Accelerate learning, assess and objectively record skills attainment.

### Shared Learning

Post perfection and challenge students to achieve more.

### Deliver Care Anywhere

Record care delivered in the home, in residential or nursing homes

### Robust Governance

Easy review of performance for review and result confirmation.

### Data Security

Secure data for assurance and record keeping.

### Reduced Cost

Less reliance on busy clinical staff, freeing their time to care.

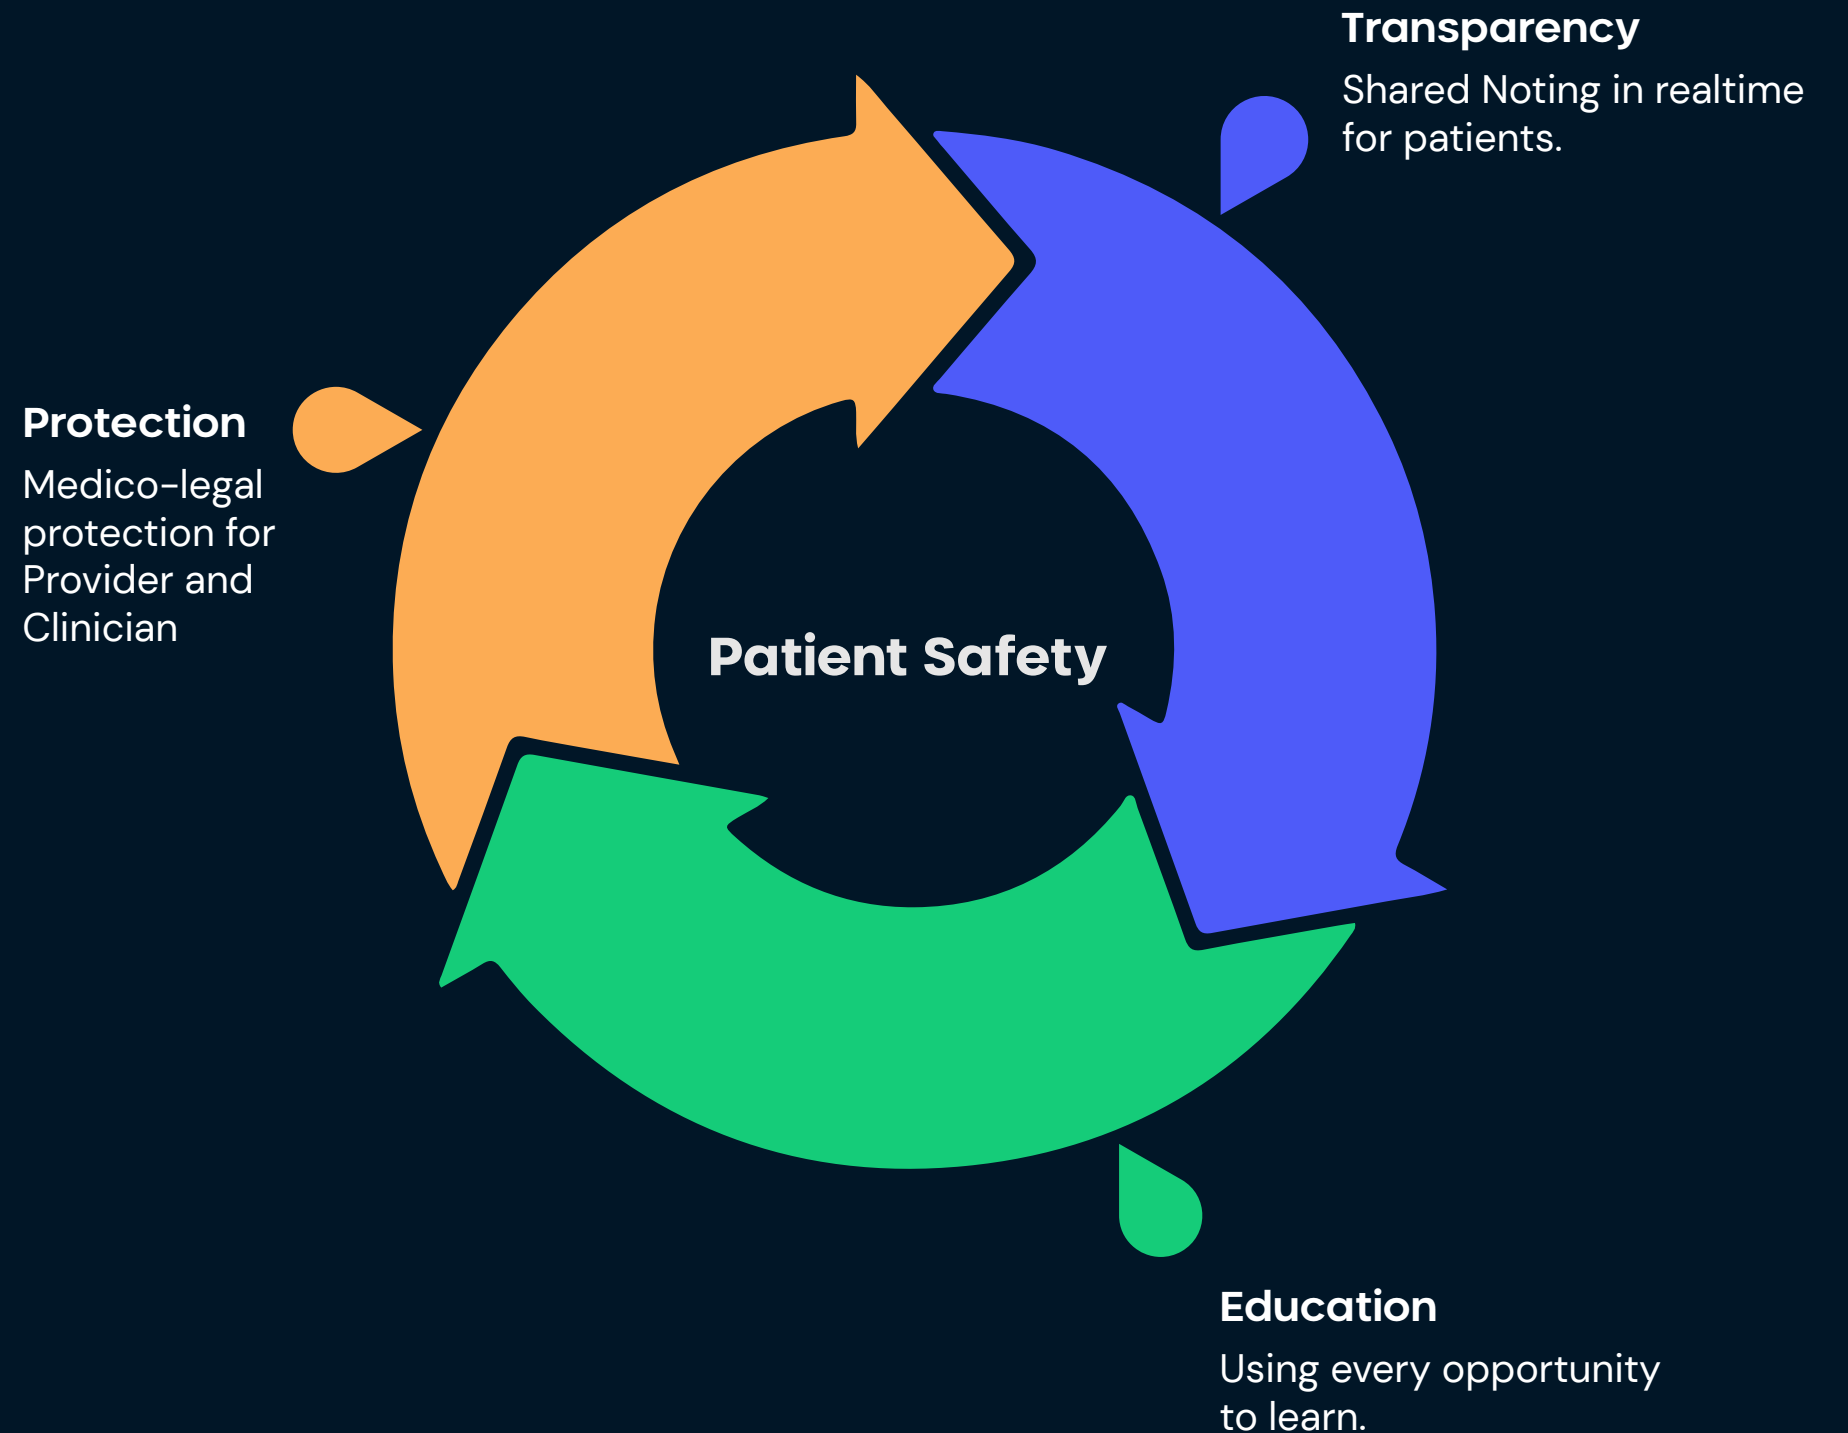

### DOPS Sign-off

Easy review of performance for review and result confirmation.

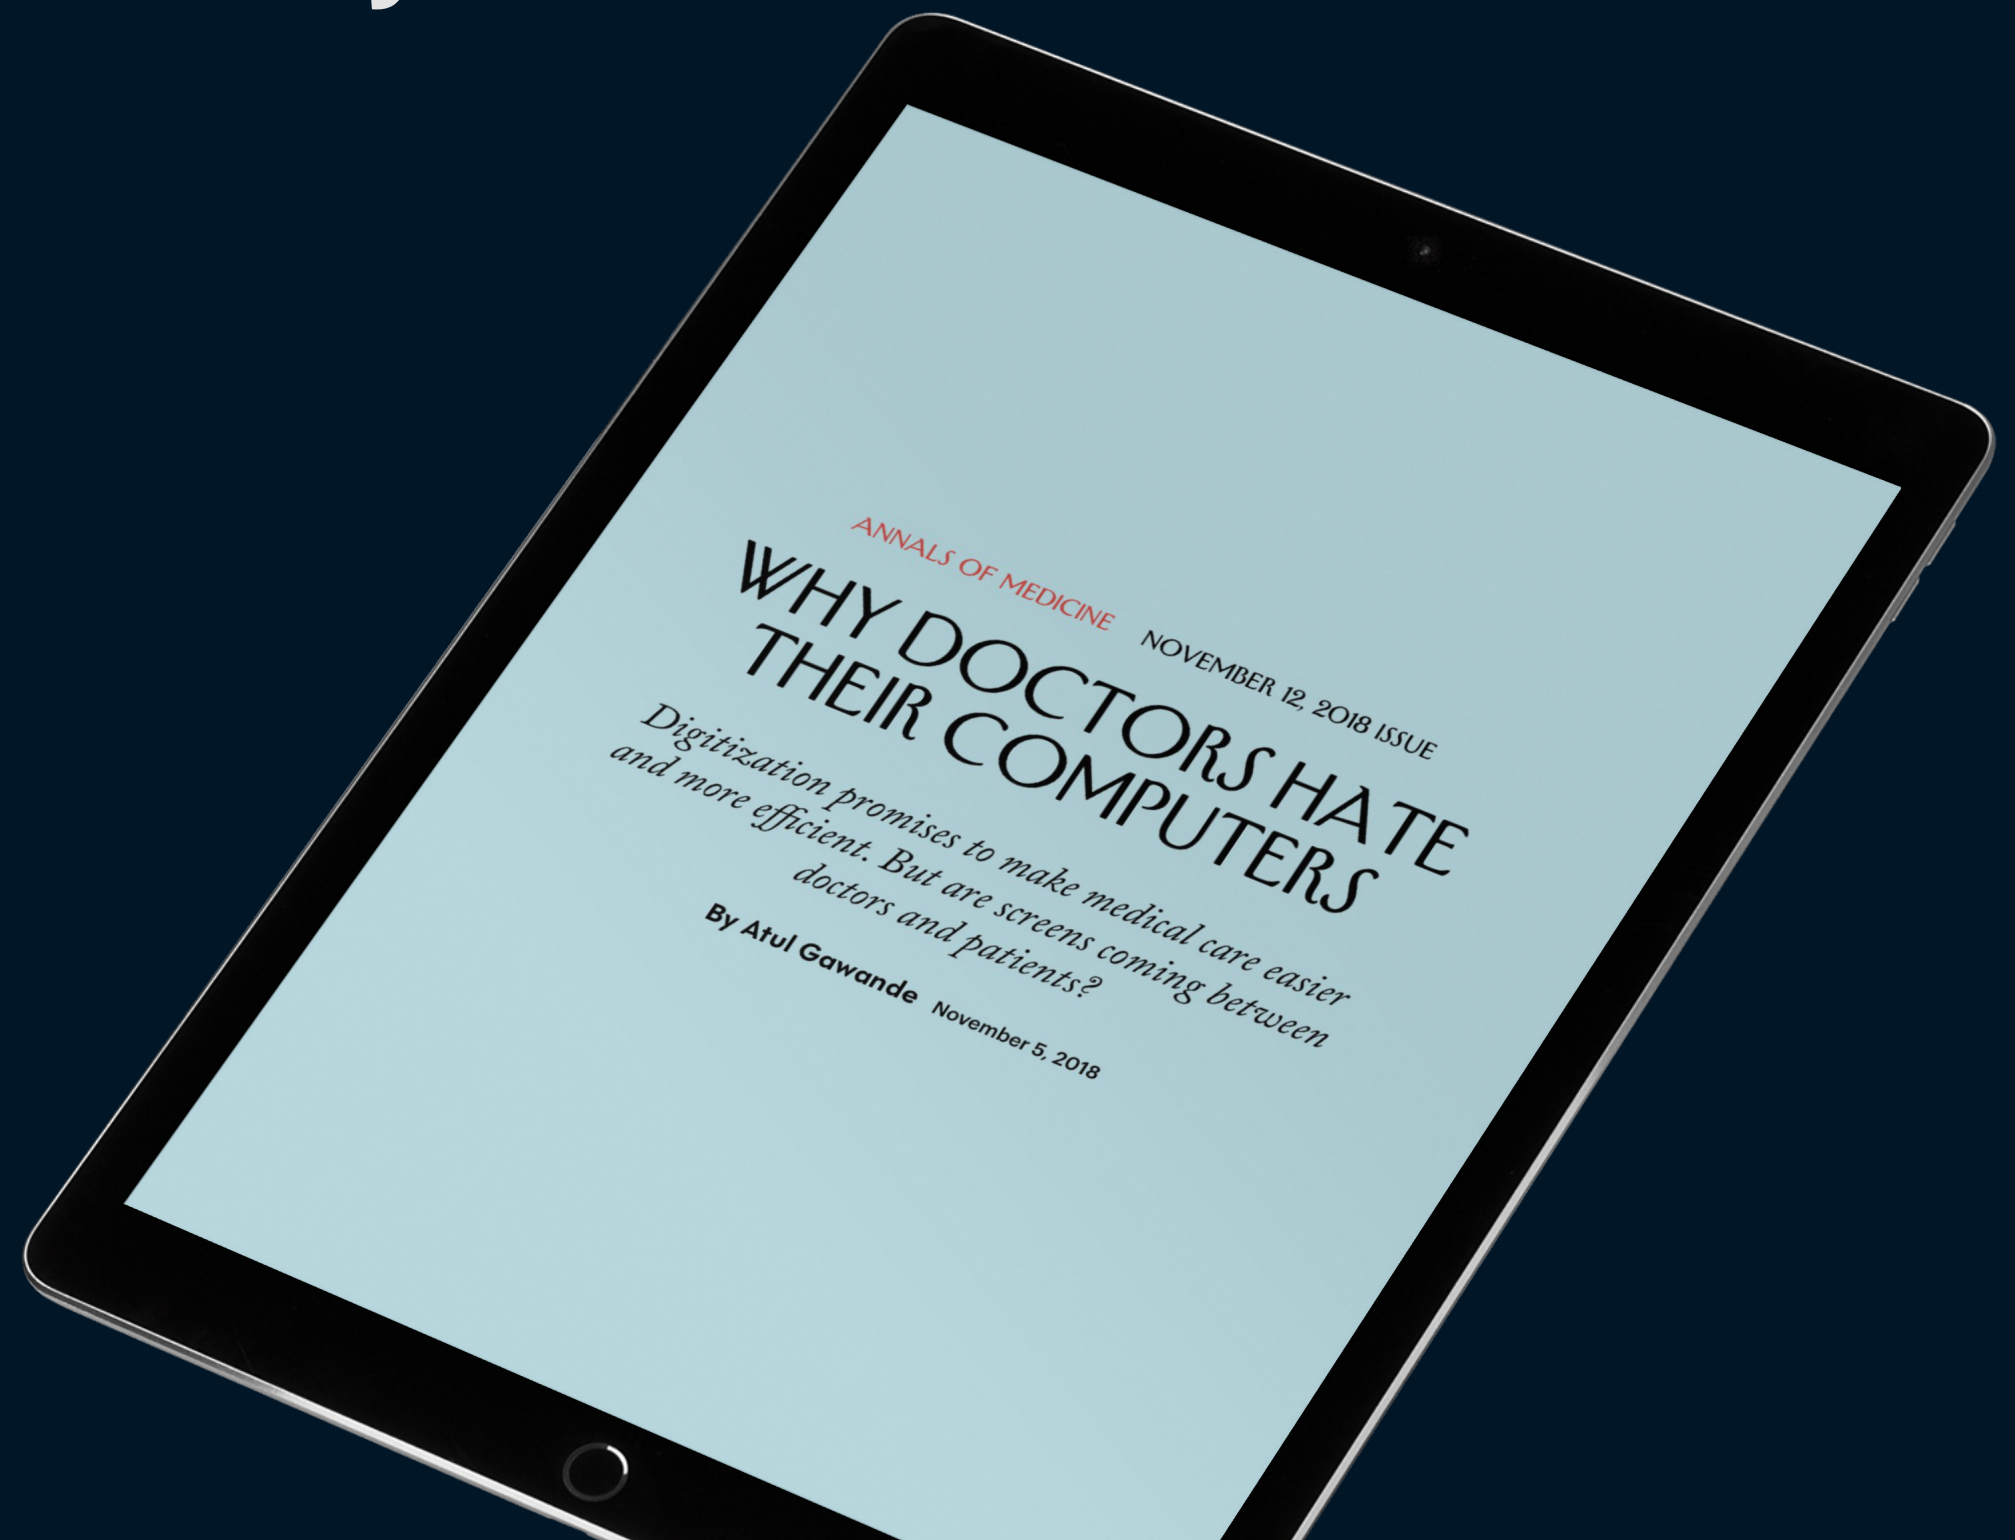

# Evolving Consent.

Growing Trust and Transparency with every recording.

# Staff have never been under more pressure than today.

- ▶ Reduced time per patient
- ▶ Less time to teach
- ▶ Greater risk of malpractice

Offer your staff all the technical support to help them to

**Round Safely.**

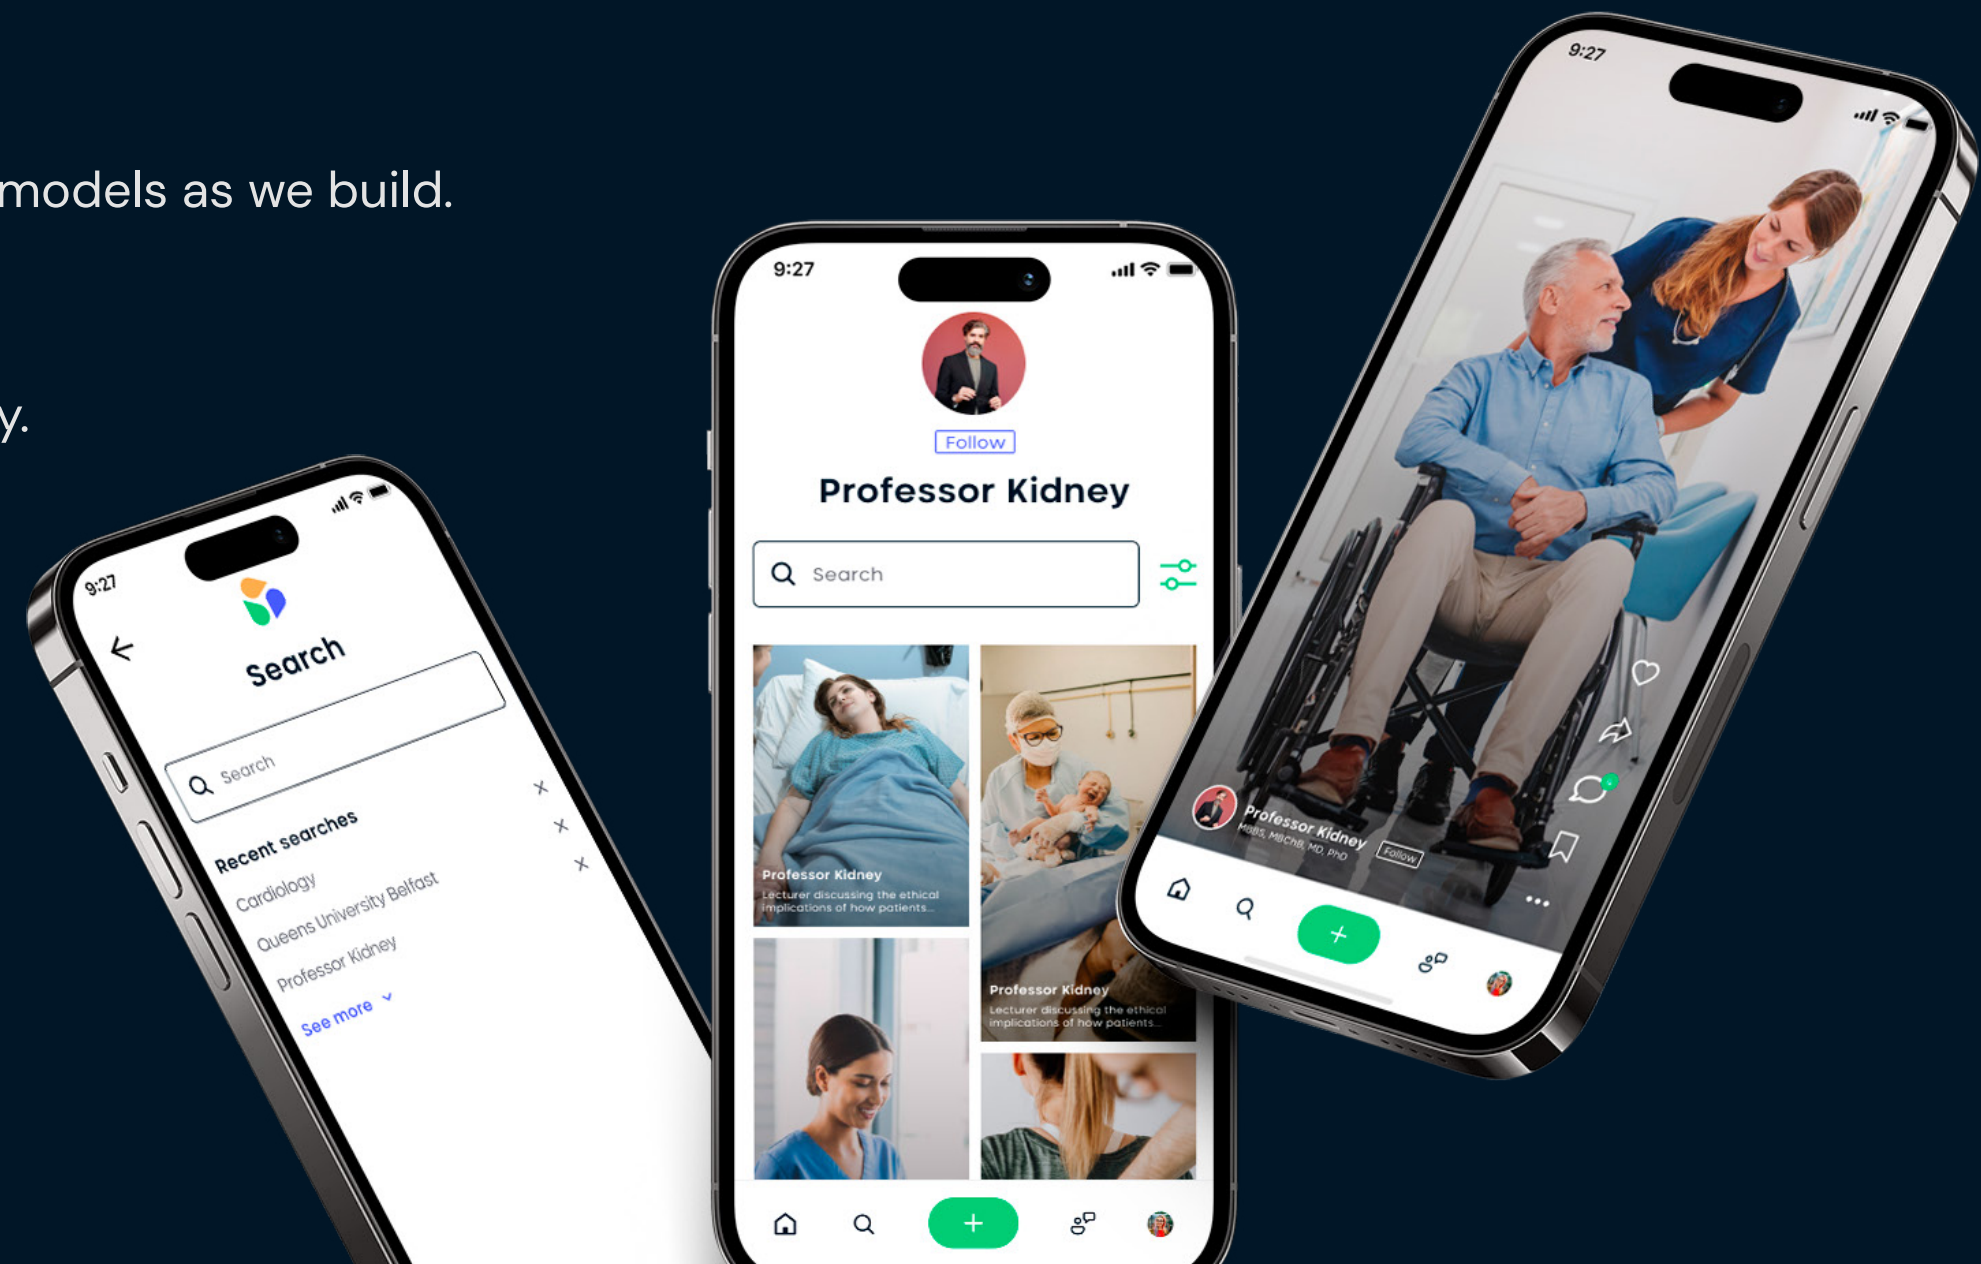

Our way in is through clinical studies & research.

Our advantage is depth of knowledge and technical expertise.

Creating auditable training logbooks and training models as we build.

Proof points to regulatory and clinical endpoints.

Clinical trials in evolved consent and transparency.

# Our Team.

**Dr Michael Quinn**

Founder – NHS Physician & Informatician  
10 years of buying and building technology  
in the public and private sector.

**Tom Brewster**

CTO – Engineering Lead  
20 yrs overseeing and implementing  
complex technologies.

**Seamus McGrath**

Senior Cloud Guru  
Unrivalled cloud deployment and delivery  
skills

**Dr Heloise Archer**

GP & Clinical Advisor  
Practicing medicine in the real world  
where solutions need to deliver.

# We are only starting.

We've implemented many clinical systems and we believe the future of healthcare will be built on video and voice technologies that accurately record the care journey.

# Challenge & Opportunity.

- ▶ EMR/EHR market 1 billion yr UK
- ▶ Care delivery in community and care home is rapidly increasing – needs new toolsets built on modern tech and new century care models.
- ▶ Medical Negligence increasing 4 billion each year in NHS
- ▶ University Medical & Clinical teaching environments
  - 50,000 med students alone in UK
  - 100,000s clinical students of various background, Physio, OT, AHP
